HOW TO SCREEN CAPTURE YOUR MAC or PC

by Mr. Techie
My personal System

Sony Vaio

• 17” laptop
• Dual Core i5 Processors (basically 4 processors- hyper threading)
• 8 gigabytes of ram
My dream System

GoBOXX 2720 Mobile Workstation

GoBOXX 2720 Mobile Workstation

Powered by a desktop Intel® Core™ i7 processor and featuring enterprise components once available only in desktop workstations, GoBOXX 2720 is the perfect solution for engineering, architecture, animation, or viz workflows. If you rely on SolidWorks®, Autodesk®, and other professional applications.

Features:

- Desktop Intel® Core™ i7 Extreme (6 core) processor (3.5 GHz)
- NVIDIA Quadro K5000M
- Up to 32GB of 1600 MHz memory
- Three USB 3.0 ports
- 17.3” Full HD (1920x1080)
- Three 2.5 SATA Hard Drives

Basic Configuration

- Intel® i7 (3.5 GHz) CPU
- 8GB DDR3 1600
- NVIDIA Quadro K5000M
- 120GB SSD SATA Hard Drive
- DVD+RW
- Windows 7 Ultimate

$3592.00
US/Canada Only

Customize & Buy
What do I need?

• You do not need the latest & greatest computer!
• The good thing is that you most likely already have it.
Using what we have on our computer

Two of the most common things we want to do, is to;

1. Do screen grabs to show examples.
2. And to create screen recordings.
   1. A screen cast (or recording) is where the computer records everything on the screen, including mouse motion and clicks.
Using what we have on our computer

- Both Mac & PC have tools built in to do screen grabs.
- Only the Mac has a built in screen recorder.
- For the PC you’ll need to download additional software.
Using what we have on the Mac

Command-Shift-4, then select an area: Takes a screenshot of an area you define and saves it as a .png file on the desktop.
Using what we have on the Mac

Our results from defining a single area.
Using what we have on the Mac

Command-Shift-3: Take a screenshot of the screen, and save it as a file on the desktop.
Using what we have on the Mac

- Of course there are multiple ways to do screen grabs on the Mac. I have a list of resources at the end of this presentation as well as on the Tech Tip Blog.
Using what we have on the PC

There are two ways to do screen grabs within the Microsoft operating system.
Using what we have on the PC

1. Simply press the “PrtScr or Print Screen” key on your keyboard.
2. This pastes it temporarily into your computers buffer.
Using what we have on the PC

Next open Microsoft Paint;
Start>Accessories>Paint

This screen shot is with windows 7
Using what we have on the PC

You have two options;
1. Simply click on the paste icon.
2. Or use the keyboard shortcut ctrl+v
Using what we have on the PC

1. Then go to the drop down menu
2. Highlight Save as
3. Select the format you want to save
Using what we have on the PC

1. Type in a name
2. Click on save
Another tool PC users have is the snipping tool!
Using what we have on the PC

Demo Snipping tool
Other PC Tools

PowerPoint 2010 has a Screenshot tool on the Insert tab
Other PC Tools

OneNote 2010 has a Screenshot tool on the Insert tab

NOTE: the Record video button records video from your web camera
Other PC Tools

MS Outlook 2010 has a Screenshot tool on the Insert tab when creating a new message (PC only)
Other PC Tools

MS Word 2010 has a Screenshot tool on the Insert tab
One last thing for both PC & Mac
